NEW YORK, April 17.—Respublican politicians from all over the State flocked to the Fifth Avenue Hotel last right, and most of them found their way to Senator Platt's room. They were all as dumb as oysters about the proposition to have a resolution passed at today's convention declaring that the party was in favor of a second term for the Governor. They were emphatic in declaring that the Convention should take no action regarding New York's choice for the Vice Presidency. On all sides could be heard talk indicating that the programme as it is now understood is that the Republican National Convention shall be stampeded for Roosevelt for Vice President, and he will be "dered to decline it."

The Republican leaders from the say occurries in the State were unanimous in praising the diplomacy of Chairman Odell that had prevented a single contested seat from figuring in the preliminary work of the Convention. There could be no mistaking the sentiment that it is a general belief of the rank and file that the programme is to get Roosevelt on the national ticket, if he can possibly be induced to go there.
